

Having an X-ray

Easy read booklet

This is an Easy Read version of some information. It has words and pictures.

You might want help to read this booklet. You can ask someone to help you.

words

Some words are **black and bold**. This means we think they are difficult words.

Black and bold words are thicker and darker. We explain what they mean in a box like this.

Some words are **bright blue**. These are links to websites or email addresses.

What will happen at your x-ray

Your doctor needs you to have an **x-ray** in hospital.

An **x-ray** is where they take a picture that can see inside your body.

The x-ray staff are called **radiographers**. They will help you and tell you what you need to do.

There is a machine in the x-ray room. The radiographers use it to take pictures of the inside of your body.

You need to stay very still when they take the picture.

X-rays don't hurt, but staying still or in one position might feel a bit uncomfortable.

Then your x-ray is done.
The staff will tell you what to do next.

How to contact us

Call this telephone number
Main Radiology
01793 605058
09:00-16:30 hrs

Send an email to this address
