

Patient Information

Guidelines following Hydrocele Surgery

We hope that your stay in our Day Surgery Unit has been comfortable and to your satisfaction. We hope that you will have a speedy recovery and that the following instructions will be of help.

Aftercare – To reduce the swelling it is recommended that you wear tight fitting underwear for the first week.

You should keep the wounds dry for the first 48 hours but you may then shower as usual. It is recommended you do not submerge the wounds in a bath for the first week.

Avoid strenuous exercise, heavy lifting and sexual intercourse for 14 days.

If you experience increased scrotal swelling, redness, increased pain or feel generally unwell please contact your GP for guidance.

Wound – Keep the wound clean and dry for 24 hours. After 24 hours the dressing (if used) may be removed. Some scrotal swelling and yellow fluid from the wound after surgery is common. The stitches usually dissolve and can take two to three weeks to disappear.

Stockings If you have been given support stockings to wear it is important that you continue to wear them, day and night, until you are fully mobile (at least 24-48 hours). The stockings should be removed for a short time daily to wash the feet and legs. You may also hand wash the stockings but do not dry them by direct heat (radiator or tumble dryer).

Pain Relief – Over the counter pain relief is usually effective for pain post procedure.

You were given the following pain killers while in Day Surgery

Paracetamol at

Codeine at

Ibuprofen at

Guidelines following Hydrocele Surgery

Instructions for patients who have had a general anaesthetic

Anaesthetic drugs remain in the body for 24 hours and gradually wear off over this time.

During the 24 hours following anaesthetic, your child is under the influence of drugs and it is important to follow these instructions:

- Do not drive a car or any other vehicle, including a bicycle.
- Do not operate machinery or appliances such as cookers or kettles.
- Do not drink any alcohol.
- Do not lock the bathroom or toilet door or make yourself inaccessible to the person looking after you.
- Drink plenty of fluids and eat a light diet, avoiding heavy or greasy foods.
- Take things easy for the day after your operation and do not work with machinery or take strenuous exercise.
- Do not make important decisions or sign important documents for 24 hours after your anaesthetic.

Some people take longer to recover from the effects of an anaesthetic so these guidelines may continue to be followed for up to 48 hours, if necessary.

If there are any problems after you return home, please telephone your General Practitioner (GP) or out of hours GP service, or the Day Surgery Unit on 01793 604148 between 8.00am and 7.00pm, Monday to Fridays (excluding bank holidays).

After 7.00pm or at weekends please contact the Surgical Assessment Unit on 01793 604039.

If you have any suggestions on how we can improve our service, we would be happy to hear from you. Please write to:
