

Patient Information

Guidelines following Wrist Arthroscopy

We hope that your stay in our Day Surgery Unit has been comfortable and to your satisfaction. We hope that you have a speedy recovery and that the following instructions will be of help.

Aftercare - The wrist will be covered with a wool dressing and crepe bandage, this should stay in place for 24 hours. Under the bandage the incision will be covered by a smaller adhesive dressing.

Moving your wrist within the confines of the bandage will do no harm.

You will need to keep your dressing / wound dry for five to seven days. After this you can have light showers.

The wound is usually held with steri strips (paper stitches); if you have anything else we will tell you before discharge. The steri strips can be soaked off after seven days.

For any discomfort your usual pain killers may be taken or Day Surgery will supply you with some.

Stockings - If you have been given support stockings to wear it is important that you continue to wear them day and night until you are fully mobile (at least 24-48 hours). The stockings should be removed for a short time daily to wash the feet and legs. You may also hand wash the stockings but do not dry them by direct heat (radiator or tumble dryer).

Follow up - If required an outpatient appointment will be sent through the post.

You were given the following pain relief while in Day Surgery

Paracetamol at

Codeine at

Ibuprofen at

Guidelines following Wrist Arthroscopy

Instructions for patients who have had a general anaesthetic

Anaesthetic drugs remain in the body for 24 hours and gradually wear off over this time.

During the 24 hours following anaesthetic, you are under the influence of drugs and it is important to follow these instructions:

- Do not drive a car or any other vehicle, including a bicycle.
- Do not operate machinery or appliances such as cookers or kettles.
- Do not drink any alcohol.
- Do not lock the bathroom or toilet door or make yourself inaccessible to the person looking after you.
- Drink plenty of fluids and eat a light diet, avoiding heavy or greasy foods.
- Take things easy for the day after your operation and do not work with machinery or take strenuous exercise.
- Do not make important decisions or sign important documents for 24 hours after your anaesthetic.

Some people take longer to recover from the effects of an anaesthetic so these guidelines may continue to be followed for up to 48 hours, if necessary.

If there are any problems after you return home, please telephone your General Practitioner (GP) or out of hours GP service, or the Day Surgery Unit on 01793 604148 between 8.00am and 7.00pm, Monday to Fridays (excluding bank holidays). After 7.00pm or at weekends please contact the Surgical Assessment Unit on 01793 604039. You can also call 111 for advice or visit www.111.nhs.uk In an emergency dial 999.

If you have any suggestions on how we can improve our service, we would be happy to hear from you. Please write to:
