1 Introduction & Purpose

1.1 **Introduction & Purpose**

The National Institute for Health & Care Excellence (NICE) (Ref 1) is an independent organisation responsible for providing national guidance on the promotion of good health and the prevention and treatment of ill health. NICE guidance aims to ensure that promotion of good health and patient care in the National Health Service (NHS) are in line with the best available evidence of clinical effectiveness and cost effectiveness, this includes:

- The care and services that are suitable for patients with a specific condition or need.
- The care and services suitable for particular populations, groups or people in particular • circumstances or settings (for example, when being discharged from hospital).
- Ways to promote and protect good health or prevent ill health.
- The configuration and provision of health and social care services, and/or,
- How national and local public sector organisations and partnerships can improve the quality of care and services (for example, how the NHS and social services work together).

Implementing NICE guidance helps to ensure consistent improvements in people's health and equal access to healthcare. For the purpose of this policy implementation is defined as a specified set of activities designed to put NICE guidance into practice (Ref 1).

Although implementing NICE guidelines is not a legal requirement, there is an expectation from external regulatory bodies and the public, for healthcare organisations to adopt and implement NICE guidance that are relevant to their services; compliance with NICE guidelines provides an assurance of the services being delivered to the patients, the Board, and local commissioning groups.

The Trust's level of compliance is submitted annually to the CQC who monitor our services against their five key lines of enquiry; changes in performance are benchmarked against national standards and with other providers.

This policy outlines the process for assuring a consistent approach towards the dissemination, implementation and monitoring of NICE guidance at Great Western Hospitals NHS Foundation Trust (the Trust).

1.2 **Glossary/Definitions**

The following terms and acronyms are used within the document:

CA&E	Clinical Audit and Effectiveness
CCG	Clinical Commissioning Group
CQC	Care Quality Commission
CQGF	Clinical Quality Governance Facilitators
EIA	Equality Impact Assessment
NHS	National Health Service
NICE	National Institute for Health and Care Excellence
PQC	Patient Quality Committee
TA's	Technology Appraisals

Note: This document is electronically controlled. The master copy of the latest approved version is maintained by the owner department. If this document is downloaded from a website or printed, it becomes uncontrolled. Version 1.0

2 Main Document Requirements

2.1 NICE Publications

A schedule of forthcoming NICE guidelines to be published can be found on the NICE website (Ref 1). The schedule outlines the proposed scope of the guideline and expected publication month to help organisations plan.

NICE guidance is usually published on their website on or around the 4th Wednesday every month and the number of publications can vary; some NICE guidelines may become withdrawn due to inadequate supporting evidence during the development process.

2.2 Dissemination of NICE Guidance

A list of newly published guidance is downloaded from the NICE website on the day it is published by the Clinical Audit & Effectiveness Department; this is usually on or around the fourth Wednesday of each month.

With the exception of Technology Appraisals, the list of guidelines are disseminated to the Divisional Governance Facilitators who identify the relevant clinical lead/s to assess the relevance and where practice meets recommendations.

The assessment and implementation of ALL new medical **Technology Appraisals (TA's)** is incorporated in a separate process led by the Pharmacy Department and Medicine Assurance Committee via the Formulary Working Group. For queries relating to TA's please contact the deputy director or director of Pharmacy.

2.3 Assessment of NICE Guidance

If the guidance is not relevant to the service, for example, it may be that some patients are referred to another hospital for a particular test or treatment, in this case this would indicate 'not applicable'

Where an assessment confirms 'unintentional non-compliance', the Clinical Lead together with the Clinical Quality Governance Facilitator (CQGF), Divisional Director and Associate Medical Director will need to decide what actions are required to be implemented to become 'Compliant' and these are recorded in the action plan section of the assessment proforma (Appendix B).

Where an assessment confirms 'intentional non-compliance' justification must be recorded in the appropriate section of the assessment proforma (Appendix B) accordingly.

In all cases, areas of non-compliance (intentionally or unintentionally) need to be risk assessed to ensure no harm occurs to patients or employees. The risk assessment section in the assessment proforma must be completed and the identified risks must be registered accordingly by a senior lead within the Division.

2.4 Monitoring of NICE Guidance

The Trust is required to report its levels of compliance to external regulatory bodies; therefore, current NICE status and progress with NICE action plans are required to be monitored to ensure NICE recommendations are on schedule to be met.

Note: This document is electronically controlled. The master copy of the latest approved version is maintained by the owner department. If		
this document is downloaded from a website or printed, it becomes ur	ncontrolled.

Great Western Hospita Dissemination, Monitoring & Reporting of NICE Guidance Policy **NHS Foundation Trust**

Divisions are required to monitor the implementation of their NICE guidelines and levels of compliance, including any associated risk assessments and action plans. Any changes to compliance or updates should be reported to the Clinical Audit and Effectiveness Department for logging onto the central NICE database.

2.5 **Reporting NICE Guidance**

The NICE database is stored, managed and updated by the Clinical Audit & Effectiveness Department.

Individual NICE guidance is logged onto the database at the time of publication; records are updated based on the information received from the completed assessment proforma and further updates as advised by the Clinical Lead/s and or Divisions.

Progress reports are prepared on a monthly basis by the Clinical Audit & Effectiveness Department for each Division to review. Quarterly updates are provided at the Patient Quality Committee (PQC), and bi-annually for the Clinical Commissioning Group (CCG) and CQC.

Additional ad hoc reports are prepared upon request.

The NICE database is also accessible by the Divisional CQGF who are also able to prepare specific reports for their respective Divisions.

Note: This document is electronically controlled. The master copy of the latest approved version is m	naintained by the owner department. If
this document is downloaded from a website or printed, it becomes unco	ontrolled.

4 Duties and Responsibilities of Individuals and Groups

4.1 Chief Executive

The Chief Executive is ultimately responsible for the implementation of this document.

4.2 Ward Managers, Matrons and Managers for Non Clinical Services

All Ward Managers, Matrons and Managers for Non Clinical Services must ensure that employees within their area are aware of this document; able to implement the document and that any superseded documents are destroyed.

4.3 Document Author and Document Implementation Lead

The document Author and the document Implementation Lead are responsible for identifying the need for a change in this document as a result of becoming aware of changes in practice, changes to statutory requirements, revised professional or clinical standards and local/national directives, and resubmitting the document for approval and republication if changes are required.

4.4 The Clinical Audit and Effectiveness Department

Responsibilities include:

- Ensuring all new published guidance from the NICE website is registered to the Trust's NICE database upon publication.
- Disseminate new NICE guidance and an Assessment Proforma (Appendix B) on the day of publication to the CQGF's.
- Provide a quarterly Trust status update and report areas of non-compliance with details of supporting action plans and /or any associated risk identified to the Patient Quality Committee meeting.
- Ensure all NICE records are accurately maintained using the Trust's NICE database as advised by Clinical Leads and/or Divisions.

4.5 Clinical Quality Governance Facilitators

Responsibilities include:

- Assess all new published guidance received from the Clinical Audit and Effectiveness Department; identify the relevant clinical lead/s.
- Disseminate published guidance and assessment proforma to the relevant clinical lead/s to complete.
- Monitor completion of assessment proformas in line with local governance arrangements.
- Work with/liaise with clinical leads to ensure timely completion.
- Ensure any completed assessments and additional upates are provided to the Clinical Audit Department for logging onto the Trust's NICE database.

Note: This document is electronically controlled. The master copy of the latest approved version is	maintained by the owner department. If
this document is downloaded from a website or printed, it becomes ur	controlled.
Version 1.0	Page 6 of 14
Printed on 13/11/2020 at 8:38 AM	

4.6 Clinical Leads

Upon receipt of new NICE Assessment Proforma, it is the responsibility of the Clinical Lead to:

- Ascertain if they are the most appropriate person to respond.
- Identify if the guidance is relevant to the Trust.
- Consider the guidance and complete the assessment proforma.
- To carry out a Risk Assessment on areas of non-compliance.
- Submit completed assessment proforma to the Clinical Audit Department within four weeks.

4.7 All Employees

All employees are responsible to ensure their compliance with this document by:

- Ensuring any training required is attended and kept up to date.
- Ensuring any competencies required are maintained.
- Co-operating with the development and implementation of policies as part of their normal duties and responsibilities.

4.8 The Patient Quality Committee

The Committee is responsible for overseeing all Clinical Governance activity in the Trust, including divisional responsibility for NICE guidance and standards. The Committee oversees the Trust Clinical Audit and Effectiveness activity.

The Committee will ensure that adherence to this policy provides assurance to the Trust Board on implementation of guidance from NICE. The Clinical Audit & Effectiveness Department will continue to ensure the NICE database is updated to provide evidence of a robust process for future Care Quality Commission (CQC) assessments and inspections.

The PQC includes key representatives from each Clinical Division, Allied Health Professionals, Medical, Nursing, Management, Clinical Audit, Infection Prevention & Control, Health & Safety, and Clinical Risk Management.

Responsibilities include:

- Providing assurance to the Trust Board about Divisional NICE Compliance.
- Reviewing and approving the Trust's annual audit programme and annual report.
- Co-ordinating the implementation and monitoring of cross Division Clinical Governance and quality management and providing support to the Integrated Governance Committee.
- Supporting the implementation of the Trust wide Audit Plan to ensure quality of patient care is in line with the best available evidence of clinical and cost effectiveness.

They also make the decisions about participation in any Clinical Audit and Effectiveness audits, based on their quality and relevance to the organisation.

Note: This document is electronically controlled. The master copy of the latest approved version is maintained by the owner department. If this document is downloaded from a website or printed, it becomes uncontrolled.

NHS Foundation Trust

Equality Impact Assessment

Are we Treating Everyone Equally?

Define the document. What is the document about? What outcomes are expected?

Consider if your document/proposal affects any persons (Patients, Employees, Carers, Visitors, Volunteers and Members) with protected characteristics? Back up your considerations by local or national data, service information, audits, complaints and compliments, Friends & Family Test results, Staff Survey, etc.

If an adverse impact is identified what can be done to change this? Are there any barriers? Focus on outcomes and improvements. Plan and create actions that will mitigate against any identified inequalities.

If the document upon assessment is identified as having a positive impact, how can this be shared to maximise the benefits universally?

Trust Equality and Diversity Objectives							
Better health outcomes for all	Improved patient access & experience	Empowered engaged & included staff	Inclusive leadership at all levels				

Our Vision

Working together with our partners in health and social care, we will deliver accessible, personalised and integrated services for local people whether at home, in the community or in hospital empowering people to lead independent and healthier lives.

Note: This document is electronically controlled. The master copy of the latest approved version is maintained by the owner department. If this doc	cument is downloaded from a website or printed, it becomes
uncontrolled.
